What To Look For In Dial-In Authentication

(The key to effectively manage large-scale remote-access servers is to
centralize management tasks)

Article Author(s): Backman, Dan
Network Computing, v 9, n 5, p 152-156
March 15, 1998

DOCUMENT TYPE: Journal ISSN: 1046-4468 (United States)

LANGUAGE: English RECORD TYPE: Fulltext; Abstract

WORD COUNT: 1962

ABSTRACT:

Authentication, authorization and accounting (AAA) are the benchmarks for dial-in authentication, as **policies** set on this issue determine a computer network security's strength. The common AAA protocols are the Remote Access Dial-In User Service (RADIUS) and the Terminal **Controller** Access Control System (TACAC). Before choosing a dial-in authentication system, companies should examine their access servers, due to differences between RADIUS or TACAC+. Among the access **policies** are the imposition of quotas, login controls and **locking** after successive failed login attempts. User name/password authentication can be compromised, and companies cope...
